O'Shaughnessy All Cap Core Fund

SEPTEMBER 30, 2018

Why O'Shaughnessy Funds?

Fact- vs. Opinion-Based Decision Making:

We make investment decisions based on empirical evidence, not subjective parameters. The evidence is supported by more than five decades of history, identifying the characteristics that we believe have led to successful investing over time.

Clear Strategies:

The strategies are intuitively logical and based on the laws of economics. They can be explained in sentences and are transparent. We show you how we invest and why.

Unyielding Discipline:

While we are always looking for improvements, the core approach generally does not change, giving you an investment philosophy to count on. We avoid the emotional subjectivity that we believe is the downfall of many conventional managers.

Why the O'Shaughnessy All Cap Core Fund?

Investment Strategy:

The strategy offers a diversified portfolio of companies across market caps and equity styles with exposure to large value, large growth, and small-mid cap stocks. Stocks are selected based on the themes that our research suggests works very well in their own right, but also in concert with each other. The strategy seeks to select high-quality stocks that are cheaper than peers, appreciating faster than peers, and have strong yield. The strategy is based on a separately managed account launched on January 2003. Please see the prospectus for the performance of that product.

The Fund's investment objectives, risks, charges, and expenses must be considered carefully before investing. The statutory and summary prospectuses contains this and other important information about the investment company, and it may be obtained by calling (877) 291-7827 or by visiting www.osfunds.com. Read carefully before investing.

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling (877) 291-7827. Performance data shown reflects the Class A maximum sales charge of 5.25% or the contingent deferred sales charge of 1.00% for the class C shares. If reflected, the load or fee would reduce the performance quoted. To discourage mutual fund timers the Fund imposes a 2.00% redemption fee on shares held for less than 90 days. Performance data does not reflect the redemption fee. If it had, returns would be reduced. Investment performance reflects fee waivers in effect. In the absence of such waivers, total return would be reduced.

** All returns greater than one year are annualized. As of September 30, 2018.

Mutual fund investing involves risk. Principal loss is possible. Past performance is no guarantee of future results. Please see important information on the following page.

* **The earnings growth rate is not a measure of the Fund's future performance.**

** Fund holdings, sector and country allocations are subject to change at any time and should not be considered a recommendation to buy or sell any security. Numbers may not add up due to rounding.

Glossary of Terms: **Russell 3000® Index (R3000)** The Russell 3000® Index measures the performance of the largest 3,000 U.S. companies representing approximately 98 percent of the investable U.S. equity market. It is not possible to invest directly in an index. **S&P 500 Index (SP500)** The S&P 500 Index includes a representative sample of 500 leading companies in leading industries of the U.S. economy. Although the S&P 500 Index focuses on the large-cap segment of the market, with over 80 percent coverage of U.S. equities, it is generally considered a proxy for the total market. It is not possible to invest directly in an index. **Price-to-Earnings:** The price of a share of a stock divided by earnings per share, usually calculated using the latest year's earnings. **Price-to-Sales:** The price of a share of a stock divided by sales per share, usually calculated using the latest year's earnings. **Sharpe Ratio:** A measure of a portfolio's excess return above the risk free rate relative to the total variability of the portfolio. **Standard Deviation:** The square root of the variance. A measure of dispersion of a set of data from their mean. **Tracking Error:** In a strategy being compared to a benchmark (e.g., market index), the standard deviation of the difference between the performance of the benchmark and the replicating portfolio. **Beta:** A statistical measure of a fund's volatility compared with the overall market. A beta of less than 1.0 indicates lower risk than the market; a beta of more than 1.0 indicates higher risk than the market. **Information Ratio:** A ratio of a fund's returns above the returns of a benchmark to the volatility of those returns. **Upside/Downside Capture:** Upside capture ratios are calculated by taking the fund's monthly return during months when the benchmark had a positive return and dividing it by the benchmark return during that same month; downside capture ratios are calculated by taking the fund's monthly return during the periods of negative benchmark performance.

ABOUT THE MANAGER

O'Shaughnessy Asset Management (OSAM) is a research-based equity money management firm based in Stamford, CT. We have done extensive analysis over a period spanning more than eight decades in the U.S. and more than four decades globally to identify the stock selection characteristics that have delivered strong absolute, risk-adjusted, and consistent returns. We make decisions that are based on empirical fact, not opinion; implement in a transparent and understandable way; and stay disciplined to our long-term objectives.

Quasar Distributors, LLC

The Fund invests in foreign securities which involve political, economic and currency risks, greater volatility and differences in accounting methods. Small- and medium-capitalization companies tend to have limited liquidity and greater price volatility than large-capitalization companies. REITs and foreign real estate companies may be less diversified than other pools of securities, may have lower trading volumes, and may be subject to more abrupt or erratic price movements than the overall securities markets. Risks of derivatives include the possible imperfect correlation between the value of the instruments and the underlying assets; risks of default by the other party to the transaction; risks that the transactions may result in losses that partially or completely offset gains in portfolio positions; and risks that the instruments may not be liquid.
